

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) A method of monitoring the provision of child welfare services to a child using a child identification card, the method comprising:

receiving child update information on the child via the child identification card,
~~the child update information including reporter information and child status information;~~

determining a location of the child via a location device in the proximity of the
child;

collecting child status information from a reporter observing the child;

storing the child update information, the location of the child, and the child
status information in a central database;

monitoring wellness of the child based on the child status information to
determine whether abuse or neglect of the child has occurred; and

providing a report based on the stored child update information and the
wellness of the child.

2. (Currently Amended) The method of claim 1 further comprising collecting
~~, wherein the reporter information~~ about the reporter that includes at least one of a case

identifier, a Personal Identification Number (PIN) of the reporter, a reporting terminal's identifier, and a GPS location of the reporting terminal.

3. (Original) The method of claim 1, wherein the child status information includes at least one of a health of the child, a status of the child, information about the child's environment, and a picture of the child.

4. (Original) The method of claim 1, wherein the child update information further includes a time and a date.

5. (Original) The method of claim 1, further comprising scanning the stored child update information to verify that child status information is being received on a periodic basis.

6. (Previously presented) The method of claim 5, further comprising generating a child alert if the child status information is not received on the periodic basis.

7. (Original) The method of claim 6, further comprising sending the child alert to a foster parent or group home responsible for the child if the child update information is not received within a first predetermined basis.

8. (Original) The method of claim 6, further comprising sending the child alert to child welfare services if the child update information is not received within a second predetermined basis.

9. (Original) The method of claim 1, further comprising processing payments based on the child update information.

10. (Currently Amended) The method of claim 1, further comprising providing ~~[[a]]~~ the case identification card to the child.

11. (Currently Amended) The method of claim ~~[[10]]~~ 1, further comprising receiving a scan of the case identification card.

12. (Original) The method of claim 1, wherein the child update information is received using an interactive voice response system.

13. (Currently Amended) A system for monitoring the provision of child welfare services to a child, comprising a child identification card and a child services computer comprising:

a memory;

a database; and

a processor coupled to the memory and the database, the processor configured to:

receive child update information on the child via the child services card, ~~the child update information including reporter information and child status information;~~

determine a location of the child via a location device in the proximity of the child;

collect child status information from a reporter observing the child;

store the child update information, the location of the child, and the child status information in ~~a central~~ the database;

monitor wellness of the child based on the child status information to determine whether abuse or neglect of the child has occurred; and

provide a report based on the stored child update information and the wellness of the child.

14. (Currently Amended) The system of claim 13, wherein the processor is further configured to receive reporter information about the reporter that includes at least one of a case identifier, a Personal Identification Number (PIN) of the reporter, a reporting terminal's identifier, and a GPS location of the reporting terminal.

15. (Original) The system of claim 13, wherein the child status information includes at least one of a health of the child, a status of the child, information about the child's environment, and a picture of the child.

16. (Original) The system of claim 13, wherein the child update information further includes a time and a date.

17. (Original) The system of claim 13, wherein the processor is further configured to scan the stored child update information to verify that child update information is being received on a periodic basis.

18. (Original) The system of claim 17, wherein the processor is further configured to generate a child alert if the child update information is not received on the periodic basis.

19. (Original) The system of claim 18, wherein the processor is further configured to send the child alert to a foster parent or group home responsible for the child if the child update information is not received within a first predetermined basis.

20. (Original) The system of claim 18, wherein the processor is further configured to send the child alert to child welfare services if the child update information is not received within a second predetermined basis.

21. (Original) The system of claim 13, wherein the processor is further configured to process payments based on the child update information.

22. (Currently Amended) The system of claim 13, further comprising a reader device for reading the case identification card associated with the child.

23. (Currently Amended) The system of claim 22, further comprising a camera configured to obtain a photograph of the child associated with ~~wherein the processor is further configured to receive a scan of~~ the case identification card.

24. (Currently Amended) The system of claim 13, wherein the ~~processor is~~
system further includes ~~configured to receive the child update information using an~~
interactive voice response system configured to receive the child update information.
